

Note Regarding Authors' requests to re-use article content published or to be published in *Biometrics*

As part of IBS's publishing agreement with Wiley-Blackwell, Wiley-Blackwell administers and collects fees for all rights and permissions requests entailing re-use and re-publication of all or part of the articles published in *Biometrics*. Wiley-Blackwell provides this service on IBS's behalf, and all of the income goes directly to the journal account for that year.

1. Non-*Biometrics* authors seeking to re-produce all or part of an article published in the journal need to submit a formal request for permission using the format specified on the Wiley Permissions page at <http://www.wiley.com/WileyCDA/Section/id-301724.html>.

2. *Biometrics* authors can use their own work without seeking Wiley-Blackwell permission in the following instances provided that the author(s) give appropriate acknowledgement to IBS and Wiley-Blackwell Publishing, as well as full bibliographic reference for the Article when it is published:

- The article or any part of it will not be sold or reproduced for commercial purposes by a third party (a party other than the original author).
- When all or part of the Article or abstract is to be used in a work in which the original author is the author or editor of the work.
- Use of the Article within the author's employer's institution or company for educational or research purposes, including use in course packs.
- Authors may post electronic versions (but *not* the publisher's PDF) of their article on a personal website, their employer's website/repository, and on free public servers in their subject area, provided that there is a link to the published version of the article with the following text: 'The definitive version is available at <http://onlinelibrary.wiley.com/journal/10.1111/%28ISSN%291541-0420>'.

3. In the case where part or all of an author's work published in *Biometrics* is to be re-published in another publication, a formal permission request must be made if that publication is not edited by or written by the author him/herself.

If a *Biometrics* author finds him/herself facing a strict deadline yet still needs to apply for Permission, he/she should email both the Wiley Rights Department (permreq@wiley.co.uk) and the Wiley-Blackwell contact for *Biometrics* (currently Mark Spencer, maspencer@wiley.com) so that we may work towards an expedited grant of rights or a waiver.
